

22 Asbestos Awareness course CAR *Control of asbestos regulations 2006*

This one day course is designed to comply with the new training requirements of the CAR 2006. The training is targeted towards contractors working in different or unusual buildings which have been identified as the highest risk where workers are often exposed to the unknown presence of asbestos fibre either by their works or because it is in a friable or unmarked condition. The course explains the hazards and risks of asbestos and where to find it how to prevent exposure.

Course components include

- Types of asbestos
- Health hazards
- Typical risks
- Fibre release and control
- Identification and sampling techniques
- PPE requirements
- Emergency procedures
- Typical materials containing asbestos
- Where to expect asbestos
- Identifying risk
- Duty holder responsibilities
