

23 Asbestos removal (unlicensed)

This one day module follows changes in the CAR 2006 *control of asbestos regulations*. These changes in association with the previous CAWR 2002 regulations allow certain works involving asbestos to be undertaken by unlicensed companies and workers, subject to compliance with ACOPs *Approved Codes of Practice*.

The course provides information on the following:

- Legislation
- Health & safety
- Risk & hazard assessments
- Scope of works permitted
- Types of work permitted
- Asbestos description and types
- Fibre release
- Containment issues
- Monitoring and records
- ACOPs
- PPE requirements
- Decontamination
- Clearance procedures and levels
- Liabilities
