

## **TERRORIST CBR & DISASTER SCENE TRAINING MODULES**

**Written by Jeff Charlton**

### Foreword

This training syllabus provides awareness and technical information specifically relevant to terrorism, CBR & the natural disaster scene generally. The different training modules are designed to address specific needs of the following groups involved both directly and indirectly with catastrophic events.

- **Local Authority, & (duty to provide information)**
- **Target audience of CCA (Business Community)**
- **Duty holders & Cat 1-2 Responders**
- **Insurance industry & allied services**
- **Recovery Contractors Management**
- **Decontamination Technicians**
- **Incident Response Teams & Facility Managers**
- **Third party interest**
- **Insurers –Freeholders**
- **Specialist Contractors**
- **Employers and the business community**

### Objective

To provide those engaged or with specific interest in the following with the necessary skills to enable safe and economical work practice, realistic expectations and the ability to work or monitor within the contaminated or damaged zone.

The training encompasses the following:

- **Disaster & CBR Information guidance**
- **Risk & Hazard reduction**
- **Prevention, Control & Mitigation techniques**
- **Planning, Recovery, Restoration,**
- **Decontamination procedures**
- **Practical hands on training**
- **Refresher short courses.**

### **Delivery**

Training is a combination of study, review and hands on practical experience. Understanding and competence is proven by examination and certification where required.

Practical hands on training is essential for decontamination management personnel and technicians. The short residential course will be held at fully equipped remote locations.

### **Standards**

The course follows all known current standards or industry best practice and follows government advice or guidance.
